## AUTHORIZATION FOR STUDENT SELF-ADMINISTRATION OF MEDICATION IN SCHOOL

I have instructed my son/daughter
Parent/Guardian signature:
Student signature (if applicable):
(School Use Only)  Epi Pen: Inhaler: Medication:  The Student understands the following: Reason for Medication Dosage of medication How to take medication How to take medication Documentation Side effects Privacy (self and others) Medication storage:
In my professional opinion this student $\square$ may or $\square$ may not self-administer the medication and use his/her medication by him/herself.
School Nurse Approval:

105 CMR 210.000

## 210.006: Self Administration of Prescription Medications

- (A) Consistent with school policy, students may self-administer prescription medication provided that certain conditions are met. For the purposes of 105 CMR 210.000, "self-administration" shall mean that the student is able to consume or apply prescription medication in the manner directed by the licensed prescriber, without additional assistance or direction.
- (B) The school nurse may permit self-medication of prescription medication by a student provided that the following requirements are met:
  - (1) The student, school nurse and parent/guardian, where appropriate, enter into an agreement which specifies the conditions under which prescription medication may be self-administered;
  - (2) The school nurse, as appropriate, develops a medication administration plan (105 CMR 210.005(E) which contains only those elements necessary to ensure safe self-administration of prescription medication;
  - (3) The school nurse evaluates the student's health status and abilities and deems self-administration safe and appropriate. As necessary, the school nurse shall observe initial self-administration of the prescription medication;
  - (4) The school nurse is reasonably assured that the student is able to identify the appropriate prescription medication, knows the frequency and time of day for which the prescription medication is ordered, and follows the school self-administration protocols;
  - (5) There is written authorization from the student's parent or guardian that the student may self-medicate, unless the student has consented to treatment under M.G.L. c. 112, § 12F or other authority permitting the student to consent to medical treatment without parental permission;
  - (6) If requested by the school nurse, the licensed prescriber provides a written order for self-administration;
  - (7) The student follows a procedure for documentation of self-administration of prescription medication;
  - (8) The school nurse establishes a policy for the safe storage of self-administered prescription medication and, as necessary, consults with teachers, the student and parent/guardian, if appropriate, to determine a safe place for storing the prescription medication for the individual student, while providing for accessibility if the student's health needs require it. This information shall be included in the medication administration plan. In the case of an inhaler or other preventive or emergency medication, whenever possible, a backup supply of the prescription medication shall be kept in the health room or a second readily available location;
  - (9) The school nurse develops and implements a plan to monitor the student's self-administration, based on the student's abilities and health status. Monitoring may include teaching the student the correct way of taking the prescription medication, reminding the student to take the prescription medication, visual observation to ensure compliance, recording that the prescription medication was taken, and notifying the parent, guardian or licensed prescriber of any side effects, variation from the plan, or the student's refusal or failure to take the prescription medication;
  - (10) With parental/guardian and student permission, as appropriate, the school nurse may inform appropriate teachers and administrators that the student is self-administering a prescription medication.
